Wow thanks Ill get on it.

Well my dad already said I cant get a computer this year so I am looking to uprade mine. I dont see any game titles I want right now but there are a few I have my eye on. Despite my bad experience with bf1942 I may try it again.

And about the video card? I tried to get a new one once butit wasnt compatible with my system so I dont know.

What video card would you reccomend? Dont let money be an issue Ill find a way

And as for my diagnosis tool I used dirext x diagnosis from my command prompt

Thanks for the info!
