---

after a few days of programming i have finally done something i thought would take me alot longer.  
but with the way i have done it can it be tested on a server with more than 4 poeple please.

the only command i have added is: !playerid it will get the id of any player from a string.

i will be adding polls next. and maby a ladder, but if not next it will be the one after.

all you will need to do (if you have downloaded the 0.60 version if replace the exe.
