Only page 2 for me.

The trade off of world conquest and not being under a government is really up to personal taste. I'd rather be a Viking, but I see that j_ball has a different set of values.

There's really only one way to settle this:

1v1, Viking vs Pirate. Viking would win, because Battle Axes > Cutlasses.

Ship vs ship, Viking Longboat vs Pirate whatever, Vikings win since nobody in history has been able to best the Vikings in the sea.

Army vs Army, Viking vs Pirate. Vikings would win, because Pirates have no army.

3/3. Vikings > Pirates.

And just to add the icing on top of the cake, Vikings star in one of the most successful--and addictive--video games of all time. Has anyone ever heard of "The Lost Pirates" or "The Lost Ninjas"? No, because they aren't as cool as Vikings.
