It is possible to make your own missions with xcc mixer, and level edit(the renegade level editor)

all you have to do it make some sort of mission, make sure it has a way to end it, then export it however you want. After that, use xcc mixer to extract a file called campaign.ini and edit the file, change the first mission from m01.mix to whatever your map is called.

If you do this it will replace the first mission with your mission!

Anyone with knowledge of level edit could do this, and anyone without could learn at [renhelp.laebui-soft.de/](http://renhelp.laebui-soft.de/)
