Lolol well i don't have it uploaded anywhere but if your looking for proof Ile upload it here, but heres the problem, My BIG SSAOW1.5 MOd is built into the SSAOW here along with my scripts for LE and yes, i was too lazy to separate it from my mod.

Its a crazy azz mod that requires the ddb i sent with it. its the one i showed in another topic with all the deployables. Ofcourse i have not put any maps in it.
