It's a model to go with a map I'm working on. It will kind of hover above the planet, and you will be able to see Earth out of the window, along with some other celestial bodies. The idea is to have a tiberium field up there, and the harvester teleported(through a stargate looking thing). Not sure if I'll keep it in, but it might make a neat addition to the map.

Please note: This is just a very sloppy draft. If I decide to go with this, I'll improve on it.
