AGT: If you are LUCKY you get direct hit with a missile which is instant death...if you are unlucky you get machine gunned to death which probably doesn't feel too good.

I chose the Obelisk of Light.

...But Havos survives a direct hit... man he must have a killer burn after that, but HEY, don't worry there's always a repair gun for that! (Repair Gun: I think that EA got a little lazy)
