after getting sick of those annoying RG pop-ups, i decided to take the time to install RG. after downloading it, i made sure the install path was right, and made sure the little (tm) was in the right place. then apon running renegade, i was asked to download 2 maps after having my renegade files scaned. i did so. then i was first confronted by this very annoy error message apon running renegade. so i reinstalled renegade and Rengaurd. then it asked me to download the 2 core patches. i did so. then i got the same f***ing error messgae. so i reinstalled Renegade and Rengaurd 5 more times, each getting the same error message. i am out of options. please help.
