escelade3 wrote on Thu, 24 August 2006 11:05I have the latest versions of the scripts, and jonwil's version of LE. Whenever i make a script zone and attach scripts to it then my LE crashes.

I can't figure out why.

Its crashing cause you didnt add the inputs in the script that you attach to the script zone.

So first add the script you to the scripr zone, then add the IMPUTS then ok it.

Understand?
