## Subject: I am considering moving scripts.dll to visual studio 2005
Posted by jonwil on Fri, 25 Aug 2006 07:33:09 GMT

Visual studio 2005 produces better code than visual studio 2003.
You would be able to use the visual C++ 2005 express to compile it (you might need the Microsoft Platform SDK installed too) as well as the full visual studio 2005 package.
If I move to visual studio 2005 I personally wouldnt be doing any specific work to make it compile with visual studio 2003 but if someone submitted patches to make it compile on it, I would proboblty accept them.

If anyone has any objecetions to moving to visual studio 2005 (given the existance of the free express edition of visual C++), now is the time to speak up.
