Like above, 3dsmax is something you would buy if you're really into it, plan to make money from it, or if you're a company that makes games. It's not something an individual would buy just because. Any mod maker out there that uses 3dsmax has surely cracked the program. If you actually start making money from 3dsmax, you'd buy the program.

The student version is meant for people like us, but unfortunately even that is quite expensive and not affordable for any of us.
