the .ttf files works for 2 or 3 launchs of renegade, then they go empty again. i made a .bat file which copys them each time i launch renegade (the cd1 need to be on a cd driver, or an image of it mounted)

copy F:\Setup\54251___.ttf C:\Westwood\Renegade\54251___.ttf
copy F:\Setup\ARI_____.ttf C:\Westwood\Renegade\ARI_____.ttf
C:\Westwood\Renegade\Renegade.exe

change the drive letters or directory path if you don't have the same
