My opinion of this game is quite simple, really- if it is good, I'm willing to eat my words and play it and love it just like I loved all the real C&C games. EA, however, has a hell of a lot of work to do before it proves that it can make a game without fucking over fans of the series.

Right now, it has not yet been proven worthy. When and if it becomes a title worthy of the series, it will have earned a place on the game rack beside its predecessors- if EA fails to produce a convincing imitation of C&C gameplay, however, this new creation will be lumped in with the crap that was Generals and ejected from a convenient airlock.
