Yet I get this

03:41] Trying to connect to server #1...Connected

[03:41] Secure link established.

[03:41] Message from RenGuard: You have been banned by inetkngEEK on 01.06.2006 16:38:00 for haxer101: renguard bypass. Goodbye.

My user name is drthsmily on Renegade and my computer went through an upgrade my father and I did. So I had to go get Renalert again, had to install Renegade again but, I miss placed my serial number. So I asked some friends if they could let me use their serial number only one of them did so I install it and install RenGuard. Then I learned he's been sharing his with allot of people on XWIS. I know about the \$20 - \$30 dollar fine/donation to get it unbanned but I really want to use RenGuard but I don't have any money on my Paypal account the card it was linked to expired. And I haven't had the money/time to get a new card to link it to my Paypal account. (who wouldn't have the time if your taking AP English, AP Physics, Ap History, and Calculus) (I still don't get Calculus) Back on topic I don't know who "haxer101" is but, I think it's one of the people my friend let use the serial number

Server I played in (O.W.O C&R, Xphazes Inf only, MP Missions, and Black Brigade Infinite) (MP Mission's banned me for being an A** to someone who kept running away from me in "Sniping duels")

Please make an exception so I can use ReneGuard for haxer101 isn't me.
