be more specific!!! poeple wonder why they get shit answers if you say "how do i lock a vehical"
poeple are going to be sarcastic.

Quote:

are you being serious!?

locking a vehicle isnt available on all servers, bnut most servers use 3 commands: !bind !lock and
!bl (bind/lock)

you have to be in the vehicle though.

it is not avaiable on all servers, my server didn't have it untill Catt998 ported ssaow to scripts.dll
2.92.

btw: Cat998, Thanks. i couldn't use ssaow because the scripts.dll it had didn't have rlmon.
