Are you stupid? I never accused you of attacking my servers.

And, I have NOT posted lies. Please specify which of my statements are supposedly *lies*

When we lost the A00000004 login, I simply stated "Yeah, Kamuix gave me his serial, ROFL." Then you said "?, change the pw then..." And as it has been mentioned before on my part, if I had any serial to any login, and they would see someone else, they would report it, find me using it, and ban me for life. I see there is no point in hell why I would *want* to do it, wouldn't anyone want to do it AND get away with it? Sure. But that isn't how things are run here.

And once again, I never accused you of attacking my server.
