As mainly a Voyager fan (it was really the only one I watched regularly as new episodes came out), I will say that you may find it less appealing as the series goes on. But I will also say that as trite and unoriginal as you might find the later episodes (though I do not) they also provide a good amount of character and story development.

I have a friend who's all about TNG that I'm trying to get started on Voyager, so I hope I can help with another person.
