Thanks for the input, keep the comments coming

UESir28 wrote on Wed, 06 September 2006 19:06 you should convert the list a bit more like here <http://ren-hq.de/serverlist.php> or here <http://blackintel.igotfree.com/index.php?page=xwisquery> and maybe only show the players if someone clicks on the servernick via a popup and add the info just like the one site have.

The second link doesn't work for me :s. Yes, I would like to include the additional server info shown on the first link I can figure it out on my own, but if you know how the server string is setup, it would speed things up.

I have added a link for REN Servers. You can now click on either REN Servers for the server list or REN Players for a list of players and Servers.

I am investigating the options of using popups or collapsed/expanded lists to show additional info.

light wrote on Wed, 06 September 2006 18:31 Serve XML, let users display it as they prefer.

Oh, and the ability to order by Players/Map would be nice.
Yes some ordering capabilities would be nice, I'll see what I can do there.

vloktboky wrote on Fri, 08 September 2006 06:49 Keep what you've got there and serve it as well. Not sure what you mean by serve it? Once the changes are complete and the pages are tested properly, I will ask to have the updated version uploaded to <http://strike-team.net/xwis/onlinelist/>.
