Merovingian wrote on Fri, 08 September 2006 15:54 Windows is fine, there's really nothing wrong with it and if you can't get multiple programs running, upgrade the RAM not the CPU.

i usually have about 6 programs running constantly all the time for months on end and i've had no problems what-so-ever.

The only problems i've had is:

virus

and.....

erm.....

That's about it.

icedog90 wrote on Fri, 08 September 2006 14:56 People who think Windows is a good operating system are nubcakes. You obviously have never used Linux before (especially with Xgl).

And the problems I have with Linux are...

erm...

umm...

nothing.
