i usually have about 6 programs running constantly all the time for months on end and i've had no problems what-so-ever.

The only problems i've had is:

virus

and.....

erm.....

That's about it.

icedog90 wrote on Fri, 08 September 2006 14:56People who think Windows is a good operating system are nubcakes. You obviously have never used Linux before (especially with Xgl).

And the problems I have with Linux are...

erm...

umm...

nothing.

Owned!

what i don't like is people that say they are used to windows and don't want to switch. well the version i am using (Suse) is very much like windows (expt all the benefits of the linux kernel)
