OK, I've RAR'ed everything up. I've split everything into three archives (map_files 42.2MB, model_files 10.0MB, textures 37.0MB). I've tried to make them as small as possible, I hope this won't be a problem. Do you want me to send this via e-mail? I use GMail which only allows 10MB attachments so I'll have to split them further.
