For some reason I keep having problems with players disconnecting after a short time. they've said that they constantly get the green "Connection to server interrupted - Gameplay is pending" message aswell. My upsteam bandwitdh is set to 750000, the port is set at 4545, and im hosting for 16.

The lag problems come with even just me and another person playing. Note, this server is running on the same computer as the one I am playing on. I've got a gig of ram, and a 3.2GHz processer CPU, and the modem is a wireless DSL at 100 MBPS. Any reason why this may be happening?
