If you would have read either my post carefully or the BlackIntel site you would have found out that we are also working in the scripts.dll so ...
I know that, my first post was in no way directed at you.

I don't like the idea of adding hooks to the open source part of SSAOW either, that and the fact that I don't know how to do the ASM on linux are the only things holding me back from doing this.

I've also considered adding my custom radio commands to SSAOW, which serve a similar purpose.
