My schools requires this to log onto its network. Problem is that it causes me to lag. It is the only thing left that can cause it.

I will be playing fine for 15-20 minutes and then out of nowhere my ping just goes through the roof. Sometimes well over 6k. Then after maybe 15-20 minutes it goes back down. This is during all hours of the day.

I have looked up the issue and people have the same problems. Is there anyway around it?
