Has for map's it would be 2 diff kind's.

1. kind be A big ass wooded area's

2. kind would be ternament map's like you would see in a PaintBall mach.

The dude that said he would make the gun's has not talk to me in like 3 day's.

I my self will be doing the ternament map's and if any one want's to make them to be nice, as for wooded map's who ever want's to make one and show me would be nice.

And only way a gokart would be added if someone would be willing to make one.

Only building that would be on is a tent and inside would be like all your gear you would not be able to pick it up tho, and it will not be alive so just be one side open the other's closed and on the back would be your PT's.
