General HavocSome of the places you need 2 people to get to. Like whrn you jump the Refinery.

_General HavocYah. For some reason a lot of peeps dont use that. I mean it does seem like an exploit. But, I think since it involves teamwork (and can also be over come by teamwork) that it is legit. Unlike some (like the one I was talking about in my first post).....oh btw I did that first thing I talked about in my post and I jumped onto that outter fence..... its kind of funny watching people run by you not even suspecting your there. I got off it though because I believe its an exploit to the game
