PsYSomeone should start a big post about all these sniper spots with screenies of them so we can all see them and help people if they ened to know.

And ACK was that realy neccesary? Where you put "Its still an exploit and I hope you are banned for it."?Is half the stuff he says necessary? But thats the great thing about America. Freedom of speech. But, I don't see how its an exploit when its modeled.....and it requires teamwork to arm it and then teamwork to disarm it.
