Renguard uses SVKP.sys for protection against is being decompiled by cheater (IIRC). SVKP.sys
is not a danger to your system.

yeah lol.. and it does it very well.... (not)

i really dont know - since so many honest RG players have problems with svkp and since its fully
'hacked' and therefore worthless - why they dont release a non-packed RenGuard version.
perhaps the 64bit os problem will be solved with this also.
3rd party exe packers almost always cause unpredictable problems.

just my 2cents.
