i have 2 ati's now, ATI AIW for VIVO stuff, and a 9500 Pro that i just got for gaming, i wouldnt recoment NVIDIA anymore, bad experiences, ATI cards are overall better, you can up quality settings and barely notice performance decrease, and they support much higher resolutions, i have a sapphire and i like it a lot, works fine without overclocking. if u want budget get a 9500 Pro(make sure it is pro not regular) if u want best quality get 9800/Pro and if you need VIVO stuff, i recommend just going with a PCI expansion card
