LR01 wrote on Sun, 01 October 2006 06:36lol, I can use the Commanche , Severside, I made the Commanche flyble in M03.mix (this works in every map) every1 was able to join and fly it

It's very easy to fake that...

Actually, when I was into drop modding I would attach the Commanche model to that of an Apache (make the Apache invisable of course) and viola, working Commanche!
