j_ball430Okay, notice the dates of those threads? August and September... of 2004. Sure, this post-dates the "over 2 years that I've known him", but it still is OVER 2 years ago.

And weren't you the one who said a guy who escaped from jail 30 years ago should go back to pay pennance for what he did, even though he started a (supposedly) new life as a law-abiding citizen?

Why the sudden change of heart?

Quote:Nick, that's complete bullshit. I am not going to defend you on something that I don't agree with.

Whoa, whoa, wait... so you're not going to jump in to defend my reputation when I have a shit-ton more integrity in my testicles than Kholdstare has in his ego... yet you're willing to take heat for the reputation of a known hacker... simply because you don't agree with me???

Y'know, you can defend a person's reputation and still disagree with what he says. It's easy. All you have to say is, "Hey, dude, you can't call him a hypocrite because yada yada yada...." That's all there is to it. You don't have to say you agree with what I say or that you think I'm right, but you can defend a person's integrity at the same time.

Again, I ask, why did you jump in to defened a hacker's reputation yet stand by while I was lambasted by Blazer?

Quote:You can generally just change your IP by resetting your modem...
Oh, so it's even EASIER to change your IP address and thus evade bans!

If that's the case, then there has got to be another way to permanently ban people besides simply banning their IPs. Otherwise, you couldn't ban shit because everyone would be able to evade them way too easily.

WarrantoErr.. where does anything he say suggest that supporting Renguard would make him a hypocrite?

Like I demonstrated, one could make a similar argument in the case of cheating. Here, he's insulting me for taking issue with someone DDoS'ing me in a N00bstories Renalert server, saying I should "get over it" and "it happens every day" and whatnot. You could construct a similar scenario with a cheater in a N00bstories server pre-Renguard days.

If I complain that so-and-so was cheating in the N00bstories server, and he comes along and says that cheating is an everyday occurance and that I shouldn't demand anything be done about it, he can't therefore go out and support any action taken against cheaters by-and-large, such as Renguard.

We could just use his own arguments against him and tell him to "STFU and read a book" when he's being cheated against in a game instead of supporting him in demanding that something be done about those cheaters.

j_ball430You just don't get it, do you? I don't give a fuck what Crimson has said. I don't care if she's telling the truth or covering something up to save her ass.

So, are you saying that you "don't give a fuck" about what a person says he's going to do, and when he does another? Or when he says he's not going to do something, and goes right ahead and does it?

Do you not give a shit when you're fucking lied to?

Unless I'm getting you confused with someone else, that should be something that you, of all people, Jake, should care dearly about.

Quote:People are still going to use RenGuard, play on n00bstories, and post on these forums. Yes, a dwindling, ever-smaller number of people.

It's shit like this, though, that drives people away.

I've explained how it worked in one of my posts in that "Bash the shit out of Crimmy" thread, though, and since this is only "THE FUCKING INTERNET" and "DOESN'T MATTER," I'm not going to be bothered looking it up for you.

xptekWhy are you quoting Crimson there? She can't be trusted. Remember?

Wow, develop that wit, and you could write for SomethingAwful.
