[View Forum Message](#) <> [Reply to Message](#)

```
char Message[256];
```

```
    sprintf(Message, "TEST;%s;%d;%d;%d;%s;%d;%s"  
, Get_Player_Name(player), Get_Player_ID(player), int(Commands-  
>Get_Points(player)), int(Commands->Get_Money(player)),  
Commands->Get_Preset_Name(player), Commands->Get_Health(player),  
Get_IP_Address(Get_Player_ID(player)));
```

This doesn't work for me :/

No it's definitely the IP part everything else works fine.
