ty

besides, I think I've found the bytes for RH8, it is quite tricky because it works in another way that is difference from the RH7.3 version and the wFDS

```
offset xxxxx | org | new  
offset 2BBAA | B8 | 90  
offset 2BBAB | 87 | 90  
offset 2BBAC | F8 | 90  
offset 2BBAD | 01 | 90  
offset 2BBAE | 01 | 6A  
offset 2BBAF | 01 | 01  
offset 3DF12 | 00 | 01
```

I don't have a box to run the RH8 version, anyone can help me to test it?
