cant you just type in a message as normal tesxt without smilies overload undeline or such a useless thing?

Underline and Bold as well as Italic and all other format options are to higlight something, make it more easier to understand or mark somthing important.

Format all you post with underline/red or very big will not make it easy to read, and belive me some people even won't reply to those topics.

btw: NeoSaber is right, use Stage 0, stage 1 is for detail mapping

For images you can use <http://www.imageupload.de.vu/>
