Can you post a screenshot when the problem arises? To do so, hit your "print screen" button and then go to Paint and do "edit -> paste". Then save the file as a .jpg - file and uploadi t to this forum.

Edit: after a lot of puzzling, I'd say you download the Renguard server software and not the client software! Be sure to use this link to download the correct program:
http://download.renguard.com/rg_downloads/RenGuard_Setup_1.0 3.exe
