JFW_PPAGE_Zone

Player type (usually 2 (0 = Nod, 1 = GDI, 2 = any))

Message (Wheee!)

Attach to anything you want... i use script zones myself.

This will imitate a "private message" or "private page" from the Host.

JFW_TMSG_Zone

See Above.

This imitates as <nick> enters the zone, then <nick> says the message as if it were them. I.E.
"zion250: Wheee!"
