Any idea how easy it is to kill a med tank with a rave? or even a light tank with a mobi?

My god, its near perfection.

The point is, learn how to kill tanks, with infantry, and youll be a good player in no time.

Why?

Because, think of this:

The other teams loaded, buying mad meds trying to rush your team.

You have 4-5 good ravesaws around, they will uaualy be shot, and if you even kill 3-4 tanks, your obi/AGT shoudl be able to kill the other 3-4 depending on the drivers skill.

Not to mention, your making them use their money, which looks bad on there team when they have 1000's then in 20 minutes are down to 100's
