Kry edited the cloudyserv.cs, I just run it, don't believe me, ask Dave4989. I can provide proof against KrY that he did the ripping. Only thing I edited was Aow.cs (The IRC Outputs of kill messages and etc.) which afaik, is legit. I just run the bot, and plus, it was temporary, I was waiting for [NR] Pre-Beta 4 to come out (now out and now im running).
Okay, so the only thing you proved was that YOU didn't rip it. However, in turn, you also proved that it was ripped, you supported the ripping of it (else you wouldn't have used it), you added to the ripping, and you changed the name of it as if it were your own. Who the fuck are you trying to kid?
