danpaul88 wrote on Fri, 27 October 2006 00:35 If you use a router to connect to the internet anyone else with a router CANNOT join your server. Nothing you can do about it.

That's incorrect

Most routers allow you to open any port you need and forward

it to your PC in your local network. It's called

Port address Translation (PAT), in conjunction with Network Address

Translation (NAT)
