spydercx2 wrote on Sat, 28 October 2006 00:43so gotz tht may fix the problem im having, i see that every1 got off topic
That would fix your problem for sure... if you do it correctly . E.g. in server.ini you set port = 5555

Then you need to go in your router admin and set port 5555 to be open for udp-packets and to forward to your internal IP-adress (of the computer where your server is on).
