Scythar wrote on Thu, 02 November 2006 07:55Heheh, it's said that in this game, the smarter you are, the harder it is to figure it out since you think the solution is more complicated than what it really is.

Not quite true.

This is thought because "smart" people usually make it more complicated than it really is. Interestingly enough, it was also mentioned that people who pursue a career in this sort of work (ie. Stat/mathematicians) have the hardest time. This is because they are hardwired to thinking in complex terms.

Intelligence has nothing to do with it (heck, I've been tested at an IQ of over 140), but rather how hardwired you are into thinking a certain way. Those who "aren't smart" appear to have an easier time, only because this has not happened to them.
