Try to get this done in a public server of 20 players...

Well, Logitechy managed it when GFUber was claiming De7 was using aimbot, tested him and as it should, proved GFUber is pretty stupid.

Note: This was in Jelly server.

It took about 5 minutes. We did have a person who was stupid where he killed the guy testing me but the mod managed to get back there in no time... All I had to do was face away from him and type ": D" Without the space of course. If you actually read what the person is saying it shouldn't take very long at all. I mean how hard is it?

Face wall

(tester goes in back of the tested)

Don't move

Type ": D"

If he moves/turns to the nearest enemy head, you have yourself a cheater. It's not a very complicated task yet when told repeatedly what to do, smoke managed to make it seem difficult...
