OK, i know how to code cnc_c130drop.txt files in Renegade to make dropoffs with driveable flying sam sites, but i dont know how to take screenshots (except in ren). If somebody could tell me how to take a screenshot, tell me because my Renguard screwed itself because of some unknown reason, so it doesnt work when it pops up. i want to take a screenshot of it, but dont know how, answees will help people, not just reading.
