Subject: Renx error...
Posted by General Havoc on Sat, 31 May 2003 21:39:58 GMT

Yeah i had that once, it was after using the W3D importer, although i would have though any plugin would have caused it. The name probably can be used to find what plugin it was. The CPP file is a "C Plus Plus" file, but the error could have been caused by anything, nothing much to worry about unless it keeps re-occuirng.
