2 things i have discovered:

1.if you press yes on the attempt save window (and it sucessfully saves) it actually saves the file in autoback, instead of overwriting your last save.

2.when saving, there is a little box with a + on it next to save, using it instead of save creates another copy with a 01, 02, 03, etc on the end. way safer than overwriting.

oh and merging doesn't work, absoloutely nofin appens(could my model have saved as a blank file???)
