Because bgkill is a mod at our server, He asked for some help some time ago with making a map, Tho I can't make a map, I told him to post on the mod forum here, Knowing that quite a few people know what there talking about and would like to help out.

He must have thought that there was some Special Inf mod, But SSAOW covers it all.

The reason I mentioned Level edit is because were getting a Inf only server soon (Tho I highly recommended Counter Strike Source server) The users Voted and Inf only won. So we choose bgkill007 to mod the map's out, All you need is level edit, right?
