I have this problem too.  
since a few days, i get a blank screen, and it doesn't respond.  
I use a router too, but it isn't wireless.  
But I don't think that it is the router. I've changed nothing with my router. I've tried to un install  
renguard, and install it again, but i only get that blank window again.  
it isn't my firewall, I've set all my defenses off, and still, got a blank window, exactly the same as  
nopol has...
