Troop

If you use warez good enough, download Vegas Video, Import your video into it (edit it ofcourse) and highlight all your movie in the Time stamp then go to

File> Render as> .wmv with the setting 3MBPS (I think)

Basicly so the quality is good.

Need a preview?

http://www.distortiagaming.com/files/CSS.wmv

 I'm still learning how to use it, but a pretty good program for makeing movies.
