I'm probably not the first person to notice this, but inside M06.mix there is a file called x6b\_pistols.w3d.

It's some cinematic file featuring 3 pistols. Nothing special at first, but when i took a closer look at the funny floating pistols, i noticed they contain a part that's left out of the pistol we know... Here's a pic:

I tried attaching the bar to the standard pistol myself, but im kind of a 3dmax/gmax retard... That's why i most humbly ask if anyone is able to do this for all of us. It would be cool to see this useless piece of heavy metal in action.
