renhelp isn't blocked thankfully(well at least at my school)

our network sys reeks, half of the students files dont work and i keep loggin on with admin priviliges (well, they fixed that now)mind you, basically all our servers are 500 yrs old and our computers are even worse. at the moment they are bringing new computers in, but not botherin to network them.

even worse, none of them have been defragged ever....

if it all comes to it, cant you just cancel the logon? (and use it as a stand-alone with networking)
